at Hotel Sagar Plaza,

Opp. SGS Mall, Near Nehru Memorial Hall, Camp, Pune 411001

Please Reply only to Email : registration@elc.co.in, or arvind.navadikar@elc.co.in,

Introduction: - 'Quality brings business' is an eternal truth. Quality tools like PPAP & MSA are very important for Quality Assurance and Effective & Efficient Supply Chain Management. The purpose of PPAP is to determine if all the customer engineering design records and specification requirements are properly understood by the supplier and the process has the potential to produce product consistently meeting these requirements during the actual production run at the quoted production rate. Measurement System Analysis (MSA) ascertains the accuracy of measurement carried out by any agency at any place during the evaluation of process / product. This enables management to take right decisions in the field of Quality.

Our programme deals with all these concept and practices so that good practices are understood by delegates for their improvement implementation plans in their organizations.

Participant Profile: - This Executive Development Programme is for all Supervisors, Managers and Executives from all functions of Materials, Supply Chain Management across the organization, Quality Control & Quality Assurance, Manufacturing, Logistics Partners, and Marketing to support Initiatives of the Organization for Lean Management.
