**Introduction:** APQP is very important Quality Assurance Tools for Effective & Efficient Supply Chain Management. APQP means Advanced Product Quality Planning and Control Plan. Product Quality Planning is a structured method of defining & establishing the steps necessary to assure that a product satisfies the Customer. The Goal of product quality planning is to facilitate communication with everyone involved to assure that all required steps are completed on time. Some benefits of Product Quality Planning are to direct resources to satisfy the customer, to promote early identification of required changes, to avoid late changes, to provide quality product on time at the lowest cost. This enables management to take right decisions in the field of Quality.

Our this one day Training Programme deals with APQP concept and practices so that good practices are understood by delegates for their improvement implementation plans in their respective organizations.

**Participant Profile:** - This Executive Development Programme is for all Supervisors, Managers and Executives from all functions of Materials, Supply Chain Management across the organization, Quality Control & Quality Assurance, Manufacturing, Logistics Partners, and Marketing to support Initiatives of the Organization for Lean Management.
