Introduction: - Industry 4.0 is a German Initiative and in another words it's Forth Industrial Revolution in the world. 1st Industrial Revolution Introduced Mechanical Production Machines powered by Water and Steam. 2nd Industrial Revolution Introduced Mass Production lines powered by Electric Energy. 3rd Industrial Revolution was through the use of Electronics and IT for further progression in Autonomous Production. Now, 4th Industrial Revolution is Based on Cyber-Physical-Systems where Machines will interact with other Machines regarding Production, Quality, Requirements and overcoming action of Shortages, Robots will be our Colleagues, Use of 3D Printing to Make Single Piece Manufacturing economical with all these efforts to take Manufacturing Processes and Parameters to yet another Height. To understand Industry 4.0 we need to know Digitization of Industries, Digital Economy, Internet of Things(IOT), Industrial Internet of Things (IIOT), 3D Printing, Artificial Intelligence, and many more new concepts and practices.

After 3rd Industrial Revolution Indian Industry has developed various Manufacturing Processes and Procedures based on Digital Steps starting from Excel Sheets to Materials Requirement Planning (MRP), Manufacturing Resource Planning (MRPII), Enterprise Resource Planning (ERP), Online Payments, Online Returns, Online Services and recent use of various Applications or Apps. Today Smart Phones is part of day to day life. The entire world knows 'Software' means India due to lot of value added contributions by our IT Industry. Government of India has already taken many initiatives towards Digital India and latest GST is one of the steps towards Digital India making Taxation Digital.

This training Programme is designed to understand all these New Concepts and Practices in simple words and to understand Importance of preparation for Industry 4.0. In today's competitive world many Industries may have our Customers abroad in line with Made in India or Make in India Initiatives. When our Customers abroad will be part of Industry 4.0 practices we will also need to be ready to supply our Goods & Services to our Customers abroad with Digital Economy drive, meeting Quality, Cost & Delivery expectations of World from our Manufacturing units in India within next decade. Our Indian Customers are also having similar aspirations regarding Quality, Cost & Delivery which also can be mate with readiness for Digital Economy and Industry 4.0. We are sure that this training programme will give lot of value additions for preparations for Digital Quality and participation in Industry 4.0 way of working.

GST is an initiative towards Digital Taxation
